PROFESSIONAL SERVICES

FLEXIBLE SOLUTIONS. REAL-WORLD BENEFITS.

Development Services

When you require enhanced customization of VBS3 products, Bohemia Interactive Simulations can rapidly deliver you a cost-effective solution. We work closely with you to meet your specific needs and guarantee you real-world benefits. If you need new functionality, models or terrain or integration development work, we can provide a solution.

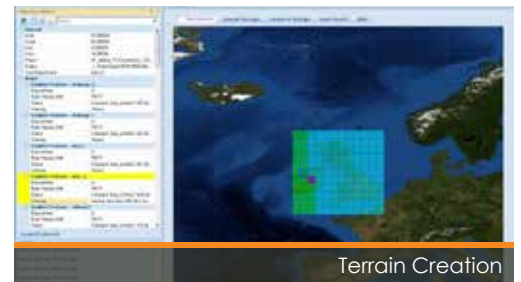

Model Creation

Model Creation

Our artistic and expert modelers can transform real-world assets into high fidelity virtual assets and ensure they 'come alive' as intended in the simulation.

Terrain Creation

Terrain Creation

You can be sure you will be working with highly accurate geospecific terrains when you contract our team of skilled mappers for your terrain creation requirements.

Scenario Development

Bohemia Interactive Simulations' designers can create tailored and effective scenarios, helping you maximize the effectiveness of your training and leaving you with more time to focus on your core work.

Scenario Development

Scripting or Engine Enhancement

To meet your unique requirements, Bohemia Interactive Simulations can create new functionality within the VBS framework.

VBS game engine supports high-fidelity, detailed terrain insets.

TRAINING COURSES

MAXIMIZE YOUR RETURN ON INVESTMENT BY LEARNING FROM THE EXPERTS.

Bohemia Interactive Simulations can provide you with professional training support in all domains of VBS3 use, including content creation, terrain generation, scripting, and exercise administration.

Choose from standard courses conducted at our training facilities or custom on-site courses.

VBS3 Administrator Course

Designed to introduce administrators or trainers to VBS3, this course instructs in VBS3 networking, scenario design, basic scripting, and advanced administrator functions.

VBS3 Scripting Course

Scenario administrators and designers will learn to manipulate the VBS3 simulation using the built-in scripting functionality to gain flexibility and greater control over scenarios and content.

VBS3 Model Import and Rigging Course

People familiar with 3D modeling can learn how to import 3D representations into VBS3.

VBS3 Terrain Generation Course

Participants will learn how to import DTED, shape and imagery files into VBS3.

Custom On-Site Courses

We offer tailored on-site courses to suit your specific needs. Typically a week in duration, the courses can be standard course material or specific to your requirements.
