Fact Sheet

Bohemia Interactive SIMULATIONS

Who we are. Bohemia Interactive Simulations creates simulation and training software solutions for military and commercial customers around the world. Our software Virtual Battlespace 3 (VBS3) is the flagship product of the U.S. Army's Games for Training program.

The VBS series has evolved over its history into a comprehensive, game-based simulation and training solution, working in live, virtual and constructive simulations.

History: Founded in 2001; Released its flagship product VBS1 in 2004, VBS2 in 2009 and VBS3 in 2014; Acquired by The Riverside Company in 2013; Acquired Pittsburgh-based TerraSim Inc. in 2013.
Operations: Offices in the US, UK, Australia, Poland, and the Czech Republic.
Employees: Around 200
Board of Directors: Peter Morrison, Co-CEO; Arthur Alexion, Co-CEO; Mark Dzulko, CTO.

Who we serve. We have longstanding relationships with many major western military organizations and defense industry contractors and manufacturers.

Our customers include the U.S. Army, U.S. Marine Corps, NATO, Australian Defence Force, UK Ministry of Defence, Canadian Armed Forces, New Zealand Defence Forces, Swedish Armed Forces, Finnish Defence Force, Netherlands Ministry of Defence, Booz Allen Hamilton, Thales, BAE Systems, Boeing International Corporation, Rheinmettal Defence Electronics, Lockheed Martin and many others.

What we offer. Our software VBS3 enables military organizations and commercial defense contractors to train users in virtual environments that

- supports very large geo-typical and geo-specific terrains,
- includes thousands of vehicle, weapons and avatar models,
- interoperates with a wide range of simulators, and
- enhances live training by providing a safe and cost-effective place to learn how to communicate and make decisions before entering the battlefield.

We allow commercial users who have purchased a VBS Developer Network license to build plug-ins or new applications for our software for sale. We work collaboratively with third-party software manufacturers and resell products that integrate with the VBS product line. BISim also provides its customers with professional services such as terrain generation, 3D modeling, scenario creation, integration with third party products and more. We offer a suite of training courses related to our products, which are staffed by expert instructors, and we offer highly responsive customer support.
